

Hello friends!

This letter I am writing you is very important to me: I want to take more care of nature, but in order to do it... I need your help!

People have invented wonderful and very useful objects, and this makes me very happy. For example: a table for... a sweater for... a wheel for...

Good! You've figured out what each one's good for!

But... do you think any of these objects pollute the environment ?

Why? What materials are they made of? And what do we do with them when they're no longer useful?

Uhhmm... I suggest we investigate this whole thing together! And then maybe I can tell the inventors your ideas.

This way they will be able to take them into account to make their next creations more respectful towards nature.

I'm sure they're going to be very happy.

I'm counting on the whole class!
