

1. After discussing as a class and reaching a consensus, we mark the human actions that produce pollution in the atmosphere and alter air quality with a cross in the white box.

Industrial emissions

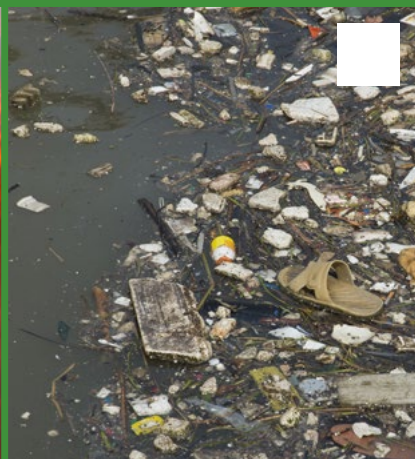

Plastic waste

Car traffic

Incinerating rubbish

Polluting a river

Air traffic

Forest fires

Deforestation

Extinction of species

2. We comment as a group and reflect on the effects that air pollution has on our health. Once we have reached an agreement we mark the corresponding boxes with crosses.

Health effects of air pollution	
May cause itchy eyes and mucus generation	<input type="checkbox"/>
It is responsible for the deaths of thousands of people a year	<input type="checkbox"/>
Sometimes causes lameness	<input type="checkbox"/>
Increased effects of allergies	<input type="checkbox"/>
Causes heart problems	<input type="checkbox"/>
Likely to cause deafness	<input type="checkbox"/>
May cause lung cancer	<input type="checkbox"/>
It is related to chickenpox	<input type="checkbox"/>
