

Faced with the situation of air pollution in cities, the municipalities in charge take measures to reduce motorised traffic in the city. As well as other measures on the use of energy in the city, to make it clean and renewable. Follow the track of the route in the maze and match the drawings with the "anti-pollution" measure they represent.

Justify why it generates improvements in people's health.

Adding bike lanes:

.....

Improving public transport:

.....

Electric cars:

.....

Green spaces:

.....

Restricting motorised traffic:

.....

Pedestrian zones:

.....
