

Domestic water stage	Pro-environmental habits aimed at saving/improving water use
<p>Origin of water: <i>Tap water:</i> where does the water that comes from your taps come from? Ask and/or research where it comes from: river, reservoir (to which river it belongs), aquifer, sea, etc.</p> <p>And if you drink <i>bottled water</i>, where does it come from? How does it get from the spring to your house? In what packaging?</p>	
<p>Uses of water How many taps are there in your house? (And other water outlets: washing machine, dishwasher, toilet, etc.)</p> <p>What about school?</p> <p>Why do you need the water that comes out of every tap every day?</p>	
<p>Destination of used water When the water leaves your house, where does it go?</p> <p>And where does it stop?</p>
